David,

No problem. My fall has filled up with talks in September in Wilmington, and Denver CO and in November in Minnesota. Don't worry about it. **Personal Matters / Ex. 6**

I will keep you in mind for wastewater projects. Triangle wastewater nearby the EPA has been working with us when we need samples.

Mark

Mark,

I owe you a very sincere apology for not responding to you earlier than this. I had asked you for topics to speak at our conference, then I didn't respond back.

Personal Matters / Ex. 6

Personal Matters / Ex. 6 At some point the Agenda Committee lining up speakers for the conference continued their work without me and filled the slots. I appreciate your offer to speak to our group but this year will not work out. Again, I apologize for not communicating with you earlier. I hope things are going well for you and your family. If you need any wastewater contacts for any of your projects, please call and I'll see if I can help.

Thanks,

David Hardin

Hi David,

I would be glad to give a talk but I do not do any pretreatment work. I could certainly discuss the work I do which is compound discovery and environmental contaminant analysis in water. I have some pertinent work I have done on discovery of novel perfluorinated chemicals in the Cape Fear river from Fayetteville to Wilmington, NC. In addition I have some work I have done on discovery of transformation products of water reclamation (N. Cary, S. Cary mostly).

We also have a recent paper from some work in Alabama this is likely less important to the NC crowd but shows these issue are in other states.

I am attaching a couple of papers from this work. Glad to talk more later when you want.

Mark

Mark,

I haven't spoken to you since the volleyball season ended. Hope you are doing well. I am on an Agenda committee looking for speakers for a Pretreatment Conference in October in Asheville NC. This Conference is put on by the NC Pretreatment Consortium which is a non-profit organization of municipal pretreatment employees from across NC to discuss regulations, enforcement, environmental testing, etc. The dioxane study is a sore subject for some of these constituents as they were pin pointed as sources and the media came knocking on their door, so this is not a topic I would want. But I'm sure you have a desk full of pertinent information. Specifically the Conference is at the Crowne Plaza in Asheville on Oct. 17-18, 2017.

Think about it and we can talk later.

Thanks for your consideration,

David Hardin
